St Martin's School Curriculum Maps 2021/2022

Year 10 – Summer Term 2022 Curriculum Plans

English Language & Literature – Exam Board : AQA

'THE SIGN OF FOUR' BY ARTHUR CONAN DOYLE / "A CHRISTMAS CAROL" BY CHARLES DICKENS (PART OF GCSE ENGLISH LITERATURE PAPER 1)

- Read a challenging 19th century text in full and in depth.
- Explore plot, characterisation, use of setting, moral purpose, writers' intentions, drama and tension.
- Cultural capital: explore wider moral, social, historical issues and how these are developed in longer texts as appropriate: e.g. class and gender in Victorian England; the Poor Law; representation of and attitudes towards the police force in Victorian England; death and mortality; religion; different audience responses; imperialist attitudes towards other cultures/races, etc.
- Use precise quotation & terminology to support ideas in summary and analysis; develop analytical writing skills. "Write a lot about a little". Learn key quotations.
- Learn and apply literary terminology and explore Doyle's/ Dickens's use of language and structure: e.g. pathetic fallacy, symbolism, imagery, tension, narrative perspective, dialogue.
- In-class assessment (exam conditions): GCSE English Literature Paper 1: Extract-based question on the presentation of a key character or theme

GCSE ENGLISH LANGUAGE PAPER 2 – WRITERS' VIEWPOINTS AND PERSPECTIVES

- Read and analyse/compare a variety of extracts from 19th, 20th or 21st century non-fiction and literary non-fiction.
- Develop students' insights into how writers have particular viewpoints & perspectives on issues or themes that are important to the way we think & live our lives.
- Students are encouraged to demonstrate their skills by: a) reading two linked sources from different time periods and genres in order to consider how each presents a perspective or viewpoint to influence the reader **AND** b) producing a written text to a specified audience, purpose and form in which they give their own perspective on the theme that has been introduced to them in section A.
- Refer to evidence in a text and use precise quotation and terminology to support ideas in summary and analysis. "Write a lot about a little".
- Learn and apply subject terminology: the parts of speech, writers' methods including figurative, phonological and rhetorical devices.
- Understand timings and skills required for the examination. Reading: Q1 Identify and interpret explicit and implicit information and ideas; Q2 Summary and inference; Q3 Analysing language and effects; Q4 Compare writers' ideas and perspectives, as well as how these are conveyed, across two texts; Writing: Q5 writing to persuade/argue/present a viewpoint, prompted by a written statement.
- Develop creative writing skills using a range of vocabulary, sentence structures and punctuation for clarity, purpose and effect using knowledge about writers' methods and conscious crafting of own writing.
- Assessment: GCSE English Language Paper 2 Year 11 PPE

UNSEEN POETRY (PART OF GCSE LITERATURE PAPER 2)

- Cultural capital: Introducing students to a range of cultures, experiences, voices and perspectives.
- The subject terminology of poetry regarding tone, mood, sound, structure, metre, figurative language and symbol.
- Use precise quotation and terminology to support ideas in summary and analysis. "Write a lot about a little".
- Refer to evidence in a text and use precise quotation and terminology to support ideas in summary and analysis.
- Develop comparison skills across two poems with a shared theme.
- In-class assessment (exam conditions): GCSE English Literature Paper 2: Extract-based question on the presentation of a key idea/theme PLUS comparison question, looking at similarities/differences between first poem and a second unseen poem

English Language & Literature – Exam Board : AQA

Generic Assessment Objectives at GCSE in English Language/English Literature

Across these units of study, students will develop the ability to:

Language

AO1: Identify and interpret explicit and implicit information and ideas; select and synthesise evidence from different texts. AO2: Explain, comment on and analyse how writers use language and structure to achieve effects and influence readers, make inferences, understand nuances in texts and know how language/structure creates meaning using relevant subject terminology to support their views. AO3: Compare writers' ideas and perspectives, as well as how these are conveyed, across two or more texts.

AO4: Evaluate texts critically and support this with appropriate textual references.

AO5: Communicate clearly, effectively and imaginatively, selecting and adapting tone, style and register for different forms, purposes and audiences. Organise information and ideas, using structural and grammatical features to support coherence and cohesion of texts. AO6: Use a range of vocabulary and sentence structures for clarity, purpose and effect, with accurate spelling and punctuation.

Literature

AO1: Read, understand and respond to texts; maintain a critical style and develop an informed personal response; use textual references, including quotations, to support and illustrate interpretations.

AO2: Analyse language, form and structure used by a writer to create meanings and effects, using relevant subject terminology where appropriate. AO3: Show understanding of the relationships between texts and the contexts in which they were written.

AO4: Use a range of vocabulary and sentence structures for clarity, purpose and effect, with accurate spelling and punctuation.

GCSE Maths Foundation Tier Classes Exam Board : Edexcel

Summer 1

Coordinate Geometry

Derive the equation of a plotted line by calculating gradient and y intercept

Deduce the gradient and y intercept of a line from an equation

Understanding of parallel gradients

Constructions

Construct 30, 60, 45, 90 degree angles

Simple loci based on perpendicular and angle bisectors

Representing Data

Interpolation and extrapolation (reliability) from scatter graphs

Causation and correlation

Plotting frequency polygons

Ratio and Proportion

Solve ratio problems when not given the total amount

Basic direct proportion

Introduction to concept of inverse proportion (workers vs time taken)

Half Term Test

Summer 2

Properties of Shape (3D)

Problems involving volume and surface area of prisms

Calculate the volume and surface area of cylinders

Real Life Graphs

Gradient of distance time graph = speed

Solve Distance/Speed/Time problems when the time is not in whole hours

Transformations

Draw a reflection of a shape in the lines y = x and y = -x

Describe a rotation about any point

Enlarge 2-D shapes using a centre of enlargement and a fractional scale factor

Describe an enlargement using centre and scale factor

Invariant points

End of Term Test

GCSE Maths Acute and Array Classes Exam Board : Edexcel

Summer 1	Summer 2
Ratio and Proportion	Properties of Shape (3D)
Direct and inverse proportion with powers	Solving problems involving surface area and volume of cylinders
Constructions Loci and regions	Solve worded problems relating to volume applying the
Sketch simple inequalities such as x<3 and x>y Real Life Graphs	conversion of litres to cubic centimetres Volume of pyramids and cones
Simple speed time graphs	Transformations
Area under speed time graph = distance (simple with	Negative scale factor for enlargement
straight lines only)	Combined transformations
Gradient of speed time graph = speed (straight lines	Column vector arithmetic
only, no tangents)	Introduce basic vector algebra and their magnitude
Half Term Test	Half Term Test

GCSE Maths Obtuse and Base Classes Exam Board : Edexcel

Summer 1

Ratio and Proportion

Solve ratio problems when not given the total amount

Basic direct proportion

Introduction to concept of inverse proportion (workers vs time taken)

Constructions

Construct 30, 60, 45, 90 degree angles

Simple loci based on perpendicular and angle bisectors

Real Life Graphs

Gradient of distance time graph = speed

Solve Distance/Speed/Time problems when the time is not in whole hours

Half Term Test

Summer 2

Properties of Shape (3D)

Problems involving volume and surface area of prisms

Calculate the volume and surface area of cylinders

Transformations

Draw a reflection of a shape in the lines y = x and y = -x

Describe a rotation about any point

Enlarge 2-D shapes using a centre of enlargement and a fractional scale factor

Describe an enlargement using centre and scale factor

Invariant points

Half Term Test

GCSE Maths Higher Tier Classes Exam Board : Edexcel

Summer 1	Summer 2		
Units, Measure and Estimating	Algebraic Proof		
More complicated bound problems, worded questions, ones involving trig	Notation for odd, even, consecutive integers, consecutive odd, consecutive even Proving expressions are multiples of integers		
Constructions	Properties of Shape (3D)		
Sketching more complex inequalities and shading regions	Calculate the surface area of cones		
Equation of a circle	Volume of simple frustums Volume and surface area of spheres		
Equation of a circle with origin as centre	Solve density problems involving different 3D shapes		
Solving simultaneous equations with one linear and one non linear	Pressure, force, area triangle Vectors		
Find the gradient of the radius and gradient of tangent	Vector algebra involving parallel vectors		
Find the equation of a tangent to a circle	Problems involving lines split in ratios Proof of straight lines using vectors (colinear)		
Half Term Test	End of Term Test		

Biology	Chemistry	Physics						
 Ecology (Combined and Separate Science) Adaptations, interdependence and competition Organisation of an ecosystem Decomposition Biodiversity and the effect of human interaction on ecosystems Trophic levels in an ecosystem Food production 	 Chemistry of the Atmosphere (Combined Science) Developing the atmosphere Polluting the atmosphere Polluting the atmosphere Using Resources (Separate Science) Sustainable Development Water Ways of reducing the use of resources Using material Fertilizers 	 Forces (Separate Science) Scalar and Vector Contact and non contact forces Describing Motion Newtons Laws Forces and Elasticity Moments Pressure in fluids Momentum Please be aware students in a different order than listed.

German – Exam Board : AQA

Willkommen bei mir! (GCSE theme: Identity and culture). Listening, reading, writing and speaking skills on the following topics:

- Total vernetzt & Technologiefeind oder –freund?
- Discussing how and when you use social media and technology
- Discussing advantages and disadvantages of social media and technology
- ✤ Zu Tisch!
- Lebst du gesund?
- Discussing traditional German meals
- Explaining how you stay fit and healthy

<u>Grammar</u>

- Expressing complex opinions with dass
- wenn clauses
- Giving opinions in the past tense
- Using subject and object pronouns
- Using relative pronouns

French – Exam Board : AQA

Listening, speaking, reading and writing skills in French covering the following:

- Discussing local, national, international and global areas of interest
- describing a region
- using the pronoun y
- talking about your town, village or district
- using negatives
- · discussing tourist attractions to visit
- answering questions
- discussing plans and the weather
- using the future tense
- describing community projects
- using the present, perfect and future tense

Exam Board : Pearson/Edexcel

Media Studies – Exam Board AQA

Revision on Industries and Audience topics in preparation for Year 10 PPE- Paper 1 Section b only- Summer 3a

Internal key vocab tests. Past papers provided as resources for students to take away. Revision checklists created for students. Revision on previous key terms from when topics were taught originally.

Demonstrate knowledge and understanding of the theoretical framework of media, contexts of media and their influence on media products and processes.

Analyse media products using the theoretical framework of media, including in relation to their contexts, to make judgements and draw conclusions. Assessment: Past paper used and modified- Section B only- 1 hour. Extended response and multiple choice questions. Marked internally and teacher assessed.

Non-Exam Assessment Practice (coursework)- Summer 3a

Apply their knowledge and understanding of media language and representations to create a media product using one of the following forms television, music video, radio, newspapers, magazines, advertising/marketing, online, social and participatory media and video games.

Use media language in a single media form to express and communicate meaning to an intended audience.

Ability to communicate their knowledge and understanding of language and representation to the reader. Demonstrate in using media language within the chosen media form. Ability to understand and create representations in the chosen media form. Communicates meanings and whether or not they have met the requirements stipulated in the brief

Audience, editing, sound, editing, effect, colours, layout, mise-en-scene, representation, brief, industries

Assessment: To produce a statement of intent and two practical pieces, which communicate meaning and have application of media language, representation and for a relevant audience. Tasks to respond to brief provided. The overall product needs to be realistic and effective. Brief changes annually, according to actual AQA brief release and to avoid overlap of content. Brief chosen to provide a range of different texts and tasks covered. Marked internally and teacher assessed.

Media Language- Paper 1 Section A and Paper 2 examination content- Summer 3b

Knowledge and understanding of how the media, through their forms, codes and conventions, communicate meanings. demonstrate knowledge and understanding of how media products reflect the social, cultural, historical and political contexts in which they are produced.

Fundamental principles of semiotic analysis, including connotation and denotation. The various forms of media language used to create and communicate meanings in media products. How choice (selection, combination and exclusion) of elements of media language influences meaning in media products to create narratives, to portray aspects of reality, to construct points of view, and to represent the world in ways that convey messages and values. The 'rules' of media language: how signs are selected, deselected and assembled to conform to codes and make meanings.

The constructed nature of reality. Theories of narrative, including those derived from Propp (character types). The relationship between technology and media products. The codes and conventions of media language, how they develop and become established as 'styles' or genres (which are common across different media products) and how they may also vary over time. Intertextuality, including how inter- relationships between different media products can influence meaning.

Codes and conventions, genre, narrative, camera angles, lighting, sound- diegetic and non-diegetic, editing, Binary Opposites, Todorov Equilibrium Theory, Narrative codes- enigma and action, connotations, denotation, signifier and signified. Intertextuality, hybrid, audience demand. Design, layout, typography, symbolic, verbal and non-verbal. User-generated content. Exposition, disruption, closure, climax resolution, complication. Sender, message, receiver. Code, anchorage, sign, icon.

Media Studies – Exam Board AQA

Industries Paper 1 Section B and Paper 2 exam content- Spring 2a

Knowledge and understanding of how the media industries' processes of production, distribution and circulation affect media forms and platforms.

Knowledge and understanding of how media products reflect the social, cultural, historical and political contexts in which they are produced.

Understanding the nature of media production, including by large organisations, who own the products they produce, and by individuals and groups.

Production processes: The impact of production processes, personnel and technologies on the final product. Similarities and differences between media products in terms of when and where they are produced. Working practices in media industries.

The effect of ownership and control of media organisations.

The impact of the increasingly convergent nature of media industries across different platforms and different national settings.

The importance of different funding models. Government funded, not-for- profit and commercial models. How the media operate as commercial industries on a global scale and reach both large and specialised audiences. The functions and types of regulation of the media.

The challenges for media regulation presented by 'new' digital technologies.

Patterns of ownership: mergers, demergers, takeovers, media concentration. Vertical and horizontal integration. Conglomerates. Diversification. Cross media ownership. Convergence of content providers, network providers and platform providers. Television licence. Advertising, sponsorship, product placement, direct sales. Independent and voluntary sector. Globalisation. Cultural imperialism.

Assessment: Teacher assessed. An extended response question (20 marks) using an unseen text as a stimulus focusing on the industries concept. Question taken from a paper 1 exam. Subject terminology must be relevant and applied consistently throughout response. Clarity of response and focus on question throughout, with discussion of wider contexts and issues.

GCSE Music Exam Board : OCR

The GCSE course is split into three components: appraising (40%), composing (30%) and performing (30%).

For the appraising aspect, students will begin studying their second Area of Study – Conventions of Pop. Students will learn and develop an understanding of:

Vocal and instrumental techniques within popular music How voices and instruments interact within popular music The development of instruments in popular music over time The development and impact of technology over time The variety and development of styles within popular music over time The origins and cultural context of the named genres of popular music The typical musical characteristics, conventions and features of the specified genres.

With regards to composition, students will continue with their first composition, a free composition, having received feedback from their first draft submitted before Easter. They should act on the feedback and refine their piece, ahead of another submission date in July where a more complete composition will be expected.

Regarding performance, students will continue to work on their solo repertoire in their own time, and there will continue to be a number of opportunities for students to showcase their work both in class and in school events. We will also continue to put together group performances in class in anticipation for the ensemble performance aspect of the GCSE. Students will continue to be encouraged to practice and perform as often as possible, both individually and in groups, to develop their skills further.

Computer Science – Exam Board : AQA

AUTUMN TERM 1	AUTUMN TERM 2	SPRING TERM 1	SPRING TERM 2	SUMMER TERM 1	SUMMER TERM 2
Programming basics Use a programming language to solve a variety of computational problems; make appropriate use of data structures; design and develop modular programs that use procedures and functions Understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use	AUTUMN TERM 2 Fundamentals of algorithms decomposition and abstraction. algorithms, flowcharts and pseudo-code, before looking at specific algorithms for sorting and searching, including the bubble and merge sorts. A final lesson covers the efficiency of algorithms, comparing the processing time and results of different algorithms on the same data sets.	Fundamentals of data representation Conversion of integers from decimal to binary, together with the binary addition of up to three numbers and binary shifts. In subsequent lessons, the use of hexadecimal numbers and character encoding is described. Representation of images and sound are covered in two separate lessons with a final lesson covering lossy compression	SPRING TERM 2 Computer systems Boolean logic, moving on to software classification including the function of the Operating System. Lessons continue to cover systems architecture and factors affecting performance. The many forms of memory available in modern computers including RAM, ROM and cache are also covered along with secondary storage	SUMMER TERM 1 Relational databases and SQL Covering the concept of a database before extending this into relational databases and associated terminology. Inconsistency and redundancy are covered before looking at Structure Query Language (SQL). SQL is used to write and interpret simple queries and to insert, update or delete data from a database table.	SUMMER TERM 2 Programming project Students will show the ability tg; design, write, test, and refine a program to a set brief.
logical reasoning to compare the utility of alternative algorithms for the same problem.	same data sets.	compression techniques used for images, sound and video, and lossless techniques such as RLE and Huffman encoding.
