Dear Parents and Carers

Re: Year 11 Mathematics Revision Resources

As we approach the final few months before the GCSE mathematics examinations, we wanted to emphasise the importance of students revising appropriately and effectively and remind them of the resources that are available to them.

To help support your son or daughter in the forthcoming exams, extra maths revision sessions will continue on Wednesdays from 3:15pm to 4:30pm in S114, where students have an opportunity to close any gaps that have been identified in lessons.

In addition to the above, it is very important that students are working through a past/practice paper per week. We have recognised in previous years that this is valuable in boosting their maths skills, confidence and grades.

Practice papers, mock papers and several useful maths resources have been uploaded onto the I: drive for easy access. These can be printed off, completed and marked using the mark-scheme provided.

Please could you reinforce that the effective use of the revision sessions/resources in the next few months can improve the outcome in their GCSE maths examination.

Thank you for your continued support at this key time.

Yours sincerely

Mrs T. Kehinde
Acting Deputy Head of Mathematics (Key Stage 4)
