Dear Parents and Carers

Re: GCSE Food Preparation & Nutrition

It has been agreed that Pupil Premium funding can be used to help support the cost of your child's GCSE Food Preparation and Nutrition ingredients for the duration of their course up to a maximum of £100.00 over the two years.

If you would like to reclaim monies spent buying ingredients for your child's practical lessons, we would need a dated till receipt for the amount spent for each practical lesson. This will need to be handed to your child's Food Technology teacher so that they can present it to finance who will organise reimbursement via cheque. We understand that often certain items such as flour will be used across several practical lessons and will therefore not need to be purchased each time.

It is the student's responsibility to inform you of the dates for all food practical lessons and to bring in the required ingredients as this helps them secure the practical and organisational skills needed for the course.

Yours sincerely

Mrs B Lewis
Head of Technology
